I. Objective type questions:

A. Read the following passage and answer the questions given below:

Penicillin is one of the most useful drugs invented by man. With its help, we can heal wounds caused by bacteria which cannot be otherwise healed. In the beginning, very few people knew of this wonderful discovery or its uses. First the scientist and then the ministers of governments were interested in it. Since penicillin could save the wounded soldiers, it was helpful in war. So, they decided to encourage the process of manufacture. Vast factories were set up for preparing it. Lives of hundreds and thousands of soldiers were saved with its help. Most people benefitted from it. Penicillin when introduced into the streams of the human blood, acts as an aid to those parts which are always fighting the deadly germs. It does not have power over every kind of bacteria, but certain kinds are destroyed by penicillin in the great majority of cases.

1. Choose the correct statement.
   a) Penicillin could save the wounded soldiers.
   b) Penicillin could not save the soldiers.
   c) Penicillin was harmful for the soldiers.
   d) Only a few people benefitted from it.

B. Read the following passage and answer the questions given below:

John Dalton was an English Chemist whose atomic theory is the basis of Chemistry. Dalton could not distinguish red from green. In 1784, he was the first to describe colour blindness which came to be known as ‘Daltonism’. The word is still used in French, Spanish and Russian. After his death, the
scientists from London and Cambridge examined DNA from fragments of Dalton’s eyes prescribed at his request by the Manchester Literary and Philosophical Society, and have shown that he lacked the gene for making green pigment in the retina. Dalton who lived from 1766 to 1844 gave instructions for his eyes to be examined after his death. He had believed that the vitreous humour, the clear substance in the inner chamber of the eyes must, in his case, be tinted blue so that it absorbed red light. At the autopsy, no such blue tint was found. But from Dalton’s perception of how he perceived light, scientists have concluded that he must have lacked the pigment in the retina that is sensitive to red light.

(1) Which colours could not be distinguished by Dalton?
(a) red from blue
(b) red from yellow
(c) red from green
(d) blue from green

(2) What instructions did Dalton give regarding his eyes?
(a) to be preserved at home
(b) to be examined after his death
(c) to be checked immediately
(d) to be kept in museum

C. Read the following passage and answer the questions given below:

Health and hygiene go hand in hand. Health refers to a state of sound mind and physically fit body, free from any form of sickness, disorder or ailment. Hygiene refers to the good practices that prevent disease and lead to good health through cleanliness, proper sewage disposal, balanced and nutritious diet, regular exercise, proper sleep, pure, fresh air and supply of safe drinking water. The proverb ‘Health is Wealth’ is truly said of all things in the world. Health is the most valuable thing that one can possess. Money is, undoubtedly, a prized possession, but can it provide pleasure to a ruined health? As body and mind are closely related, the mind can never be sound and cheerful without sound health. An unhealthy man may have intelligence, merit and wealth but he cannot put them to use and reap their benefits. We
must, therefore, adopt proper hygienic measures to preserve and maintain good health. Too much work or exercise, eating or drinking are injurious to health. A regulated life coupled with clear and pure mind makes life worth-living.

(1) **Hygiene refers to practices that lead to good health through:**

   a) balanced diet  
   b) impure air  
   c) abundant wealth  
   d) regular play

(2) **Life will become worthless through:**

   a) gambling and drinking  
   b) regulated life  
   c) pure mind  
   d) healthy body

(3) Health and hygiene go hand in hand. (True or False)

D. Read the following passage and answer the questions given below:-

One night, a man came to our house and told me, “There is a family with eight children. They have not eaten for days.” I took some food and went out. When I finally came to the family, I saw the faces of those little children disfigured by hunger. There was no sorrow or sadness in their faces, just the deep pain of hunger. I gave the rice to the mother. She divided it in two and went out, carrying half the rice with her. When she came back, I asked her, “Where did you go?” She gave me this simple answer, “To my neighbour - they are also hungry.” I was not surprised because poor people are generous but I was surprised that she knew they were hungry. As a rule, when we are suffering, we are so focused on ourselves; we have no time for others. We become selfish and self-centred. Having experienced the pangs of suffering, we should, rather, extend helping hands to the poor and the needy.

(1) The faces of the children reflected:

   a) sorrow  
   b) joy  
   c) hunger
(d) greediness

(2) The action of the mother shows:
   (a) selfishness
   (b) hatred
   (c) gratitude
   (d) love

(3) The faces of the children were disfigured by hunger. (True/False)

Q.8 (a) Write a précis of the following passage and give it a suitable title.
Tension and headaches are the most common type and are caused by muscle contractions or an imbalance of natural chemicals in the brain. The pain causes a band like pressure around the head and may be accompanied by a sense of tightness in the head, neck and shoulder muscles. They often begin in the afternoon or evening and produce a steady pain. Prevention is the best approach; relaxation techniques, such as bio-feedback, massage, meditation and visualization, work for many. Another recommendation is to eliminate all foods and drugs that contain caffeine from the diet which can increase tension and anxiety, thus, contributing to headaches. Headache may also be due to sinusitis, and inflammation of the lining of the sinus cavities. This causes a deep, dull ache around the eyes and sometimes in the forehead and ears. A good diagnostic clue is that the pain tends to worsen when you bend over.

(b) Write a précis of the following passage and give it a suitable title.
For religion to be effective, enthusiasm is necessary. At the same time, we must try to avoid the danger of multiplying of creeds. We avoid that by being a non-sectarian sect, having all the advantages of a sect and the broadness of a Universal religion. God, though everywhere, can be known to us in and through human character. No character was ever so perfect as Rama Krishna’s and that should be the centre around which we ought to rally; at the same time allowing everybody to regard him in his own light, either as God, saviour, teacher, model, a great man just as he pleases. We do not preach social equality but that every being has the same rights and insist upon freedom of thought and action in every way. We reject none, neither theist nor pantheist, monist, polytheist, agnostic, nor atheist; the only
condition of being a disciple is modelling a character, at once the broadest and the most intense. Nor do we insist upon particular codes of mortality as to conduct, character, eating and drinking, except so as far as it injures others.

(c) Make a précis of the following passage and give it a suitable title.

Speech is a great blessing, but it can also be a curse, for, while it helps us to make our intentions and desires known to our fellows, it can also, if we use it carelessly, make our attitude completely misunderstood. A slip of tongue, the use of an unusual or ambiguous word and so on, may create an enemy where we had hoped to win a friend. Again, different classes of people use different vocabularies, and the ordinary speech of an educated man may strike an uneducated listener as showing pride. Thus, speech is not a gift to use likely without thought.

(d) Write a précis of the following passage and give it a suitable title.

The modern man is forever busy meeting deadlines, keeping appointments and living life. He has no time for himself. In his hurried routine, he prefers to eat junk or fast food, which is prepared and consumed instantly. The term ‘junk food’ was coined by Michael F. Jacobson in 1972. Junk food contains less minerals, vitamins and proteins, so it does no good to the body as it lacks nutritional value. Fast food chains are popular worldwide. They serve food which is saturated in fats and sugar. These foods are gaining popularity in small towns also. School/college canteens as well as corner shops are stacked with such items – French fries, burgers, pizzas, chips, noodles, etc. These are available off the shelf too to pick on the go. Fast food is served at birthday parties and other social functions. People forget that such foods are major sources of obesity, hormonal imbalance, high blood pressure, diabetes, etc. It contains little fiber, so it does not provide enough nutrition and leads to chronic constipation resulting in other diseases. School and college tuck-shops should sell fresh fruits and juices, sprouts and salads. Milk and butter milk should replace aerated drinks, as these things have higher nutritional value than burgers, chips and noodles.
